Nigella Chain: Fast, Reliable, Transparent Next-Generation Blockchain Network

abstract

Nigella operates as an independent project on the Blockchain network, prepared with the EVM infrastructure. It is not an ICO but rather a next-generation Blockchain network. Transactions are stored on servers located in 8 countries worldwide. You can develop your own crypto contracts on this network. Contracts created on networks like ETH and BNB also work directly on Nigella Chain. The primary goal of Nigella Chain is to become one of the most popular networks in the Blockchain world.

This project, created by an experienced team with numerous successes in the software industry over a long period, aims to implement many products quickly. This adventure, which started in Turkey, will soon become popular worldwide.

It's important to note that Nigella Chain is not just a Blockchain network. Many projects such as Nigella Food, Nigella Pay, Nigella Wallet, Nigella Stake, Nigella MLM, Nigella Swap, and Nigella Shop will also be part of its operations. In short, significant innovations are expected in the Blockchain world with Nigella Chain. Its primary goal is to directly integrate blockchain into real life.

What is Nigella Chain?

Nigella Chain is a project developed under the leadership of a Turkish team. This project, which has its own private Blockchain network, offers users an innovative approach by developing products that provide convenience. NGL (Nigella Coin) aims to be listed on international cryptocurrency exchanges, providing users with opportunities for profit and investment. However, this forms only the foundation of the project. Within the scope of the Nigella Chain project, a series of innovative projects are being developed, most of which are in the Beta stage. All projects are expected to be released for use by the end of 2024.

Nigella Chain operates using the EVM infrastructure and enables users to create their own crypto projects. This secure and fast network is a decentralized database that records transactions and tracks assets. Transactions are verified by distributed nodes and recorded in an immutable manner, ensuring high security. Nigella Chain offers an ideal technology for various applications such as finance and supply chain management.

Market and Competition

Nigella Chain project is an initiative developed under the leadership of a Turkish team and has the potential to succeed in a competitive market. However, it should progress considering the complexity of dynamic fields like Blockchain technology and rapidly changing competitive conditions. While Blockchain fundamentally transforms business operations, continually developing new and innovative solutions will be necessary to solidify its position in the market.

In this competitive environment, understanding user needs and providing them with suitable products is crucial for the success of the Nigella Chain project. Additionally, adapting quickly to regulatory changes and industry developments is essential. This will enhance the project's competitiveness and ensure long-term sustainability.

Nigella Projects

We have completed most of our projects, including Nigella Pay, Nigella Stake, Nigella Coin, Nigella Wallet, Nigella MLM, and Nigella Diamond Club. You can access details of these projects on our website. We plan to launch unfinished projects by the end of 2024.

- Nigella Pay: This application provides services with payment methods such as physical POS, virtual POS, and QR payments using \$NGL.
- Nigella Stake: It is a method where coin holders lock their coins to support the network. Users earn rewards by holding locked coins and contribute to the security of the network, thus encouraging community participation.
- Nigella Swap: Enables fast and secure exchange of coins on the Nigella Chain, increases liquidity, and facilitates easy transition between various crypto assets.
- Nigella Token: Consists of tokens on the Nigella network and facilitates easy transactions on the network.
- Nigella Wallet: Provides a secure and user-friendly digital wallet experience. It is an ideal option for managing your crypto assets and transferring them securely.
- Nigella MLM: Integrated multi-level marketing program of Nigella Chain. Users earn commissions from product sales and generate additional income by attracting new users.
- Nigella Diamond Club: An educational program that enables those interested in Blockchain and NFT technologies to gain certified expertise.
- Nigella Food: Our Clean Food project from field to product. It is our production tracking system, which will be very important in the future, based on ensuring the authenticity of the food supplements products we already produce and proving that the product is produced healthy.
- Nigella Blockchain Academy: A social responsibility project we have implemented to highlight the benefits that Blockchain technology will provide to humanity in the future.

Tokenomics

We have produced a total of 188 million NGL. Only 25% of this will be available for sale, while the remaining 75% will be locked for use in future projects.

Stake

We are diligently working on the Staking plan for \$NGL. We will soon share this plan with you on our website along with its details.

Nigella Chain Project Team

Founder-Coordinator: Fatih EKE

CEO: Harun Enes ORAK CTO: Serkan ÇAKMAK CFO: Refik KAPTAN

Marketing Director: Aykut BABAR

Marketing Director (TJK): Sharraf RAHMANOV Marketing Director (RU): Mimoza MATKERIMOVA

Marketing Director (KGZ): Aida ISMAILOVA

Marketing Director (UZ): Maxfuza XHALIMATOVA Marketing Director (AZ): Nigar ALEKPEROVI

R&D: Alisher SHARIPOV

Marketing Director (KZ): Didary BURKITBAY

Production-Logistics Coordinator: Alaeddin BALKILIÇ

Operations Manager: Özge DURMUŞ

Operations Manager (RU): Sardal MURTAZAEV
Operations Manager (UZ): Matluba QALANDAROVA

Marketing Coordinator: Nurpais USENBAEV

10. RoadMap

2024 Q1

- Nigella Wallet and Nigella Pay user interface improvements
- Product development and improvement activities
- Evaluation of beta test results and improvements
- Blockchain integration tests
- Launch of the beta test program
- Planning marketing campaigns

2024 Q2

- Completion of Nigella Pay's POS devices and online payment integrations
- Completion of Nigella Stake and Nigella Wallet products
- Creating Social Media Communities
- Identification of marketing campaigns
- Coin Market Cap and Coingecko listing completed
- Pre-sale of Nigella Coin on three different platforms
- Launch of Nigella Stake and Nigella Wallet
- · Listing on three cryptocurrency exchanges

2024 Q3

- Widespread distribution of Nigella Pay cards
- Expansion of international payment networks
- Popularizing the use of Nigella Coin
- Announcing global partnerships
- Product improvements based on user feedback
- Launching Nigella Diamond certificate programs
- · Pilot implementation of the Nigella Clean Food product traceability system
- T1 Exchange listing

2024 Q4

- Implementation of expansion plans in new markets and regions
- Launching the Nigella AI Program
- Publishing igella Clean Food sustainability reports
- T1 Exchange listing
- Setting and announcing strategic goals for 2025
- Special events for the Nigella Chain community.
- Announcing the Big brands that want to join Clean Food.
